Overview

STARTRONIC 330 230V

cod. 829033

Digital, microprocessor controlled battery charger, maintainer and starter for charging all types of batteries (GEL/AGM/START-STOP), with 6/12/24V voltage and starting of cars, vans and trucks. Startronic protects the on-board electronic such as ABS, airbag, electronic injection, etc.

Running modes: TEST, CHARGE, TRONIC, START and STAND-BY.

The STAND-BY function is activated through connection to the cigarette lighter outlet of the car, it allows to disconnect and charge the car battery without erasing the preset values of the on-board computer.

The TRONIC function allows for the electronic control of charging current, automatic interruption and restart.

The new implemented technology SAFE START does not damage the on-board electronics during the starting phase (START) because it eliminates the overvoltages typical of the traditional starters.

Features:

- choice of charge current 1÷30A - display to check battery voltage, charging current and time - display to check battery status - protection against reverse polarity, battery failure, thermostatic interruption, faulty battery charger.
